

BOND

System Design

BOND adapt

Adapt's most defining characteristic is its true configurability

Our design functionality allows customers to make modifications without changing the underlying source code. These changes include the following:

System Design

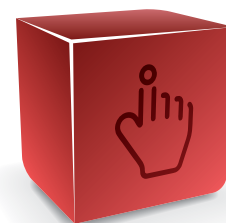

- Colors
- Screens
- Dashboards
- Tables
- Fields
- Picklists
- Searches
- Reports
- Calculations
- Workflow
- Document Libraries
- Email Templates
- Web Modules
- Security
- Integrations

Business Objects

Database Design

Menu Editor

Screen Builder

Search Builder

Our J2EE based application contains a toolset that is used to develop and build upon new and existing configurations. We supply a number of 'out of the box' recruitment solutions tailored specifically for each market sector within the staffing and recruiting industry. Whichever solution you choose, we will configure it to meet your needs, or we will provide the tools that enable you to easily configure Adapt for your business.

Fully configurable workflow with a seamless upgrade path
