

BOND

Lotus Notes **Integration**

BOND adapt

Adapt has bi-directional synchronization with Lotus Notes. No additional software is required and Adapt loads the integration as a service upon login. All calendar, tasks and e-mail messages within Adapt are automatically synchronized to Lotus Notes.

Lotus Notes **Integration**

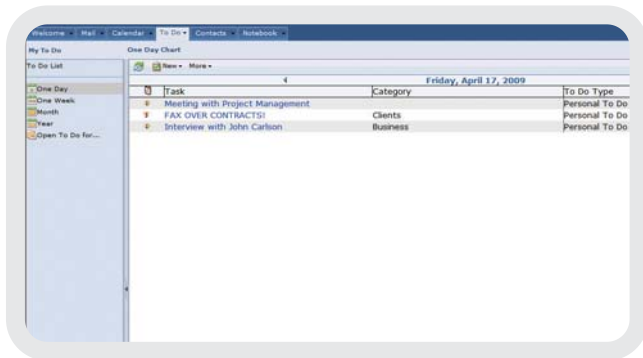

Calendar

From the Adapt calendar, individuals can synchronize with Lotus Notes. Any activities within the specified time frame on the Lotus Notes calendar will be copied into the Adapt calendar. A confirmation screen will appear to update the status on the incoming items.

Email

All emails that are started from Adapt are executed using Lotus Notes. Clicking the Tag icon allows Adapt to pull emails from Lotus Notes and link them to the corresponding record.

Tasks

Tasks can be created from any number of places, whether it be from the candidates, contacts, company, or job order record. If the task is time specific it will become a calendar item. Any update of a task in Adapt will automatically synchronize with the individual's task list.
